# Testing Principles

## *Test Principle number 1 of 7:*

Testing shows the presence, not the absence of defects.

Testing can show the presence of defects.

Testing can not show the absence of defects.

Testing can not prove that the work product contains no defects at all.

# Testing Principles

## Why we can not prove a software is free from defects?

Testing every thing is impossible.

New defects can be introduced during SDLC or after updates.

Complexity of work product.

Some defects may appear in specific workflow combinations.
